

Report on the Calcutta Cyclone of the 5th October 1864

By James Eardley Gastrell

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 Excerpt: . terminating either in rain only, or at the utmost, in a few hours squally weather. In 1859 the Barometer, at the end of September, was as much above the average as in 1864, but was followed by no Cyclone. The different Barometer curves such as we have them are given on Plate VI. A great discrepancy will be observed between the two curves for Calcutta. This is partly accounted for by the difference of the instruments, the standard being more sensitive than that observed by Mr. Cogswell, and partly by Mr. Cogswell s observations having been made at shorter intervals during the height of the storm, and by their being unreduced for temperature; but we cannot but consider that the 3 o clock observation of the standard has been erroneously read or recorded, whether owing to the emotional perturbation of the observer, or other causes....
